

To ensure a safe working environment and a quick response in case of emergencies with hazardous substances, all hazardous substances that are brought to the NAF premises must be recorded.
 It is therefore essential that you enter all hazardous substances used in this form and send it to us in advance together with the current safety data sheets and the valid operating instructions by e-mail to Besucher@nafaxles.com.
Hazardous substances that have not been registered in advance may not be used.

	Hazardous substance designation	Current safety data sheet	Valid operating instructions
